

2005-12-08-Localizing Debuncher Bumps

Thursday, December 08, 2005
4:16 PM

- Procedure:
 - Take a reference orbit
 - Un-bunch the beam
 - Activate bump
 - Re-bunch beam
 - Take an orbit
 - Mask all BPMs inside of the bump except the target BPMs
 - Set BPMs to Read - Target
 - Send trims
 - Re-bunch beam
 - Mults => $(\text{end value} - \text{start value}) / \text{target size}$
